Porcelwood™

Wood effect porcelain...

perfect wood effect adding an air of luxury and elegance to any floor and wall.

Why is porcelwood better than wood?

- *Hardwearing - Perfect for commercial projects, family homes and retail units - years of use and abuse in these applications and it will still look great.*
- *Easy to clean - Bleach, hot water, steam mops, industrial scrubbing machines - can all be used with no negative effect to the tiles.*
- *Resistant to scratching, dents, scrapes, water, sunlight and fire! Real wood will need sanding and re-finishing after a few years of use.*
- *Better conductivity for underfloor heating so will keep you warmer than real wood ... unless you burn it!*
